

**Developed by 6Conecta, a Nalanda Group company.**

# **COLLABORATIVE PRL SOFTWARE**

Make the digital transformation possible for the Health and Safety of your company, take control and save time and errors. Do what you do best: reduce incidents. A collaborative environment that will allow you to make preventive management shine in your company, free yourself from excels and papers, and involve everyone from any place and device.

## What is

---

A set of modules interconnected to an intelligent cloud, which allows you to control your company's Health and Safety policies effectively.

Allow your entire company to **participate in preventive management at all levels, from management to the last employee.**

It helps you comply with current regulations and ISO 45001 without headaches, bureaucracy, and allows you **to focus on the most important preventive work, making a more agile follow-up and measuring its impact.**

## How our PRL Software works

---

Your company's users can use **any device** connected to the Internet, and use a series of interrelated **modules** that share information and provide solutions to various day-to-day needs of your company's preventive management. They do so with different roles and degrees of access. Managers know the **key indicators to help them decide**. Preventionists carry out high-value preventive tasks. Employees are informed, trained and participate.

With our occupational risk prevention software, **the preventive culture of your company is developed and strengthened every day.**

# Modules

## Diary

- Your preventive activity automatically generates a **calendar with upcoming expirations, expected dates, delays, actions**, etc.

## PRL Employees

- Compliance Management.
- Linking the position with the risk profile.
- Automation of **information tasks, training, PPE and medical examinations**.

## Activities

- Take full advantage of your **inspections, observations or periodic controls** in the field.
- Digitize preventive activities with your own process by designing your own checklists.
- Take photos and create tasks with different managers on site.

## Risk assessments

- Use different methodologies** as needed (Binary, Fine, MMC FPSICO, Telecommuting, RD1215, Noise, Ergonomics, etc.)
- Start with your own model evaluations or with your history so as not to start from scratch.
- Automatically generates job tokens.

## Planning

- Unique and centralized.**
- Create tasks, assign people in charge, control execution times, include costs, etc.
- The entire management system generates tasks centrally, whether from an evaluation, an inspection or an incident.

## Continuous improvement

- Follow-up of **non-conformities, corrective actions, risk notifications...**
- Promotion of continuous improvement and definition of action plans compatible with your Health and Safety management system.

## Accidents and incidents

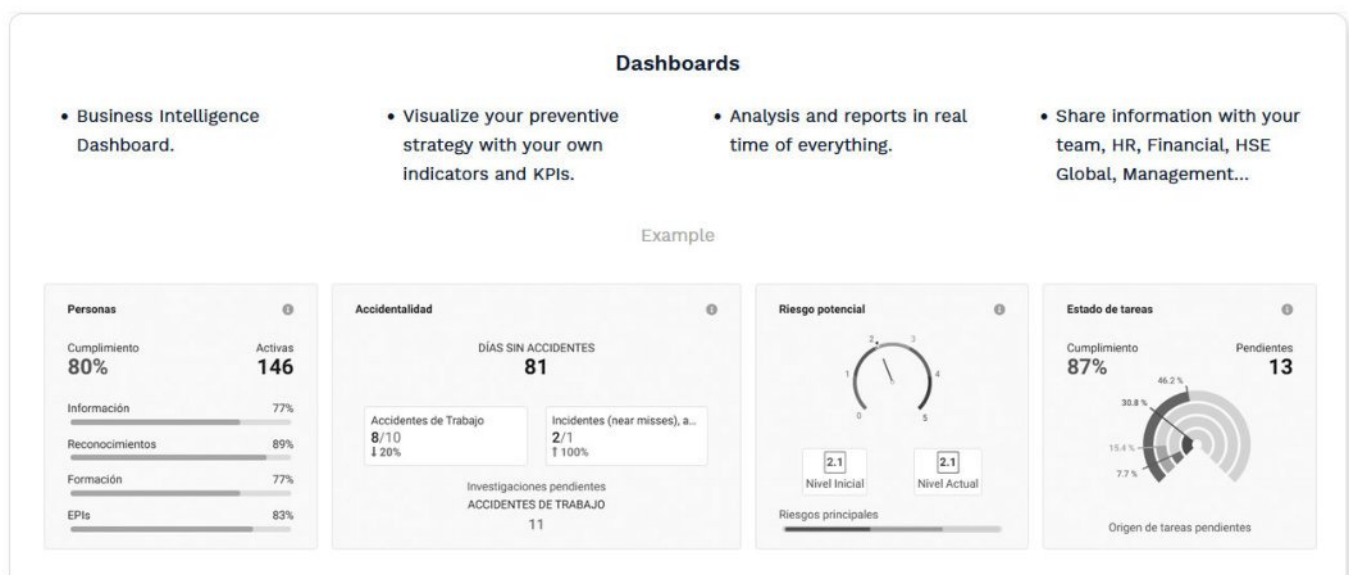

- Compatible with your accident and incident investigation model.**
- Different methods of cause analysis: 5 whys, cause-effect...
- Sending of flash communications and/or investigation report.

## ORP Intranet

- Enable **your employees access to a modern preventive portal.**
- Improve participation rates.
- With integrated electronic signature to avoid printing papers.

# Fundamental indicators

# Any device

With your PRL App, your Health and Safety department:

**Enjoy full mobility**

**Complies with regulations**

**Make decisions quickly**

**Integrate prevention**

Everything in your PRL App

- All your mobility procedures.
- All the tasks of your management system with filters, access to files and photos.
- Even your dashboards.

- Employee compliance.
- Advanced electronic signature.

- Your preventive activities online.
- On-site operations: checklists, photos, attachments, generate tasks.
- Collect the signature of the participants.

- Investigation of accidents on the ground. Build flowcharts with levels of responsibility, include photos and annexes, create tasks with measures.

# Benefits of ORP Software

## Save time and mistakes so you can focus on what's really important

Dedicate more time to prevention by freeing yourself from bureaucracy, paperwork and outdated excels.

## Create a real impact on the Health and Safety of your company

Create a real impact on the Health and Safety of your company

## Collaborate with everyone in an intelligent cloud and go from so much mail

From anywhere, with any device, collaborate with other technicians and employees of your company to bring your plan to fruition.

## Make your work shine and give it the visibility it deserves

Track all preventive work in your company, and give directors and employees visibility through simple dashboards in real time.

## Full mobility for greater agility

Fully adapted to any mobile device, our PRL software allows you to work, inform and decide on the spot.

## 360° solution, created and updated by preventionists

6conecta, a Nalanda Group company and led by prevention experts, develops and keeps the software up to date, aligning it with your needs, legislation and regulations.

## Technology, integrations and adaptations

### Conecta lo esencial con tu ERP corporativo

Synchronize the data of your employees, positions, centers, and contracts between your ERP and our PRL software.

### Digitize your documents and find anything

Using OCR text recognition technology, keep your document archive in order and perform powerful searches and queries.

### Custom developments and reports

Ask us what you need and we take care of getting it for you.

### Customize everything with your corporate image

Use your custom subdomain, your corporate colors and logos.

### Control user access via SSO

Using SSO (Single Sign On) technology, you can control all user access to our PRL platform, from your environment (eg. Azure AD): access and credentials.

### Connection with your CAE

Unify the information of your PRL Software with that of your CAE Document Management.

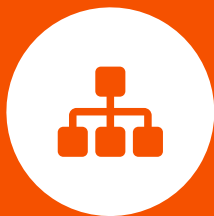

# Why our PRL Software is the most useful

## 4 electronic signature solutions

Delivery, acknowledge receipt and collect signed documents and waivers of information, training and PPE with full legal validity.

Do the same with your own documentation, configuring your own templates: appointments of preventive resources, emergency teams, etc.

### Intranet

#### Simple electronic signature

You just need employees to have access to our employee portal module.

### Signature pad

#### Advanced electronic signature (eIDAS Compliance)

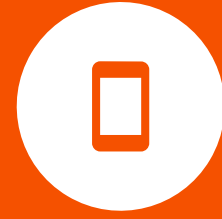

Specific signature peripheral is required (compatible with Topaz but also integrable with other brands). The document is consulted and signed on the platform.

## E-mail

### **Advanced electronic signature (eIDAS Compliance)**

Only necessary e-mail of the signatory to sign from any own device. Use our system or we integrate yours.

## Smartphone

### **Advanced electronic signature (eIDAS Compliance)**

An authorized manager collects the signatures through our App on a Smartphone/Tablet in an agile, simple and mobile way.

- **Spend much less management time**

Collecting acknowledgment of receipt of a job posting or PPE involves a large amount of time and operations that involve everyone. With our electronic signature, you will delegate and collect signatures with a few clicks in record time

- **Centralize processes**

Launch all the signature requests from our platform and collect the signed documents, organized and accessible to whoever is needed from anywhere at any time.

- **Reduces costs significantly**

Forget about preparing forms, getting them filled out, the trickle of collecting signatures, scanning and archiving on paper or scattered and decentralized folders. Time is money that you can spend on higher value tasks.

- **Guarantees legal validity**

Integra soluciones de firma electrónica simples o avanzadas, para que, dependiendo de la solución que escojas, cumplas con el Reglamento UE eIDAS o el USA e-Sign.
