

Find reliable suppliers

SUPPLIERS DIRECTORY

Find new suppliers classified in more than 5,000 activities and by their geographical scope. Get to know their previous work, rating, reliability and solvency: all, documentary proven.

What is the suppliers directory?

The supplier directory is a powerful supplier database in a cloud, the result of common knowledge collected through the management of your CAE and homologation documentation.

The need to provide documentation and information for previous or ongoing projects guarantees a totally reliable and continuously updated database by the suppliers themselves.

How does the directory work

Do you want to find reliable and solvent suppliers? Our powerful search engine allows you to use multiple criteria. You will be able to refine your results among more than 5,000 activities and tens of thousands of suppliers (suppliers, subcontractors, renters, consultants...). In addition, you will be able to find out if they are approved and if they already work for your company, general data, type of company, scope and location, or if they have CAE documentation and quality certificates, among others.

By accessing a unique database, updated by the suppliers themselves, you will be able to choose candidate suppliers to participate in your project from thousands of activities and geographic scope; as well as consult the data that you consider necessary before contracting.

Even if you wish, you can request offers through our integrated shopping tool and get a comparison automatically.

Process

01 Browse through the activity tree until you find the activity you need for any of your projects.

02 Filter by companies that have their contracting documentation up to date and consult their documentary Rating.

03 Consult the detail file of the companies found.

04 If you wish, you can also use our integrated purchasing tool.

Suppliers Directory Benefits

Select suppliers of documentary proven reliability

Both suppliers and subcontractors prove their reliability documentary or through compliance questionnaires and qualification documents.

Know its documentary Rating

By means of a simple documentary Rating you will ensure that the subcontractor is not only, but has been reliable and solvent.

Integration with the most advanced purchasing tool

If you wish, you can launch your RFQ/RFIs for offers through our purchasing tool.

Get to know their real experience in previous projects

Suppliers leave a trace of the projects in which they have worked since they had to provide the QHSE and administrative documentation for those projects, thus guaranteeing you real previous experience.

Find just what you are looking for

Our suppliers are self-classified at the highest level of detail so that you can cover all your needs.

Why Choose Nalanda Suppliers Directory

The most powerful search engine

Find suppliers for more than 5,000 activities, type of company, and scope or geographic location.

Integrated with our Document Management and Supplier Homologation services

You will be able to access the documentation and information to ensure that your suppliers are reliable and solvent and that they meet quality and compliance standards.

Documentary rating

You will know if the suppliers have been updating their documentation correctly during the last months, indicating long-term reliability.

Information updated by the suppliers themselves

Only a database updated by the providers themselves in their interest to search for new opportunities, guarantees you the most up-to-date information: contact, commercial, financial information and links to their own websites.

Proven previous experience

Curriculum of projects where subcontractors have used our document management platform, and therefore, fully verifiable.

Possibility to go one step further and launch RFQ/RFIs

You will be able to launch your RFQs/RFIs to the selected suppliers in a simple integrated way and get offers and variants later integrated in an automatic comparative table.

Importance of suppliers

Suppliers are the main source of support for each and every one of the companies and businesses that are to be created, since regardless of the function to be executed, all of them must obtain enough 'raw material' to be able to carry out their work in some way. mode.

The supplier is in charge of providing goods and services to a company so that it can carry out its daily activity and fulfill its mission. Their role is essential to improve productivity and guarantee the correct commercialization of products and services. In addition, good supplier management is also key to the proper functioning of a company's operations, since it has a direct impact on the quality of services, costs and the final perception of customers. Therefore, being able to choose the best suppliers for each business is key to the success of a company. And that is precisely what we offer you at Nalanda.
